

Acryl8 Topical Skin Adhesive Is the ***SMART CHOICE*** for Wound Closure

Acryl8 is a topical skin adhesive with a familiar and easy-to-use applicator designed for effective wound closure.

## KEY FEATURES

### Precise, Controlled Application

Our unique applicator is safe, efficient, and easy to activate and control. It utilizes a non-clogging ampoule that allows for precise application.

### Seals Wounds Quickly

Acryl8 requires one layer of application in a single stroke. It polymerizes in seconds and has been proven to be as effective as sutures in closing surgical incisions and lacerations.

### Inhibits the Growth of Bacteria

Acryl8 inhibits the growth of bacteria as long as the adhesive film remains intact.

### Better Patient Experience

Patients no longer have to endure injections, restrictive dressing, and the painful process of suture removal.

### No Follow-Up Appointments

Patients no longer have to endure injections, restrictive dressing, and the painful process of suture removal.

### Strong, Flexible Octyl Formula

Acryl8's octyl formula maximizes the durability and flexibility of the adhesive.

### Fast Set Times

The average set time for Acryl8 is less than 60 seconds.

## WHY ACRYL8 MATTERS TO PHYSICIANS

Wound closure is a vital component of every OR procedure. Our adhesive flows easily through the applicator allowing physicians to work at their own pace. The elliptical shaped applicator tip allows for narrow or wide application and prevents leaking or dripping.

***Acryl8 provides better wound closure.***
